

# BUSINESS

# CAPTURE

Time is money. Give your small business members more of both with Business Capture, a convenient, self-service deposit option they can use to capture check images remotely and transmit directly to your credit union. Less time running into the branch and quicker access to funds offers business members the convenience and flexibility they need for success.

## BENEFITS

- + Eliminate missed deposit deadlines for same-day credit that many businesses face as a result of time constraints, traffic or other business-day delays.
- + Address the obstacles of limited branches, making it easier for small businesses, sponsor groups and select employee groups (SEGs) to use a credit union.
- + Consolidate all deposit activity for your credit union.
- + Increase your credit union's commercial deposits.

## FEATURES

- + Web-based software. Other than a scanner driver, there is no desktop software to install at member businesses.
- + Credit-union managed settings include business name and location, business users and permissions (scan batch, search, reports), and business review limits, including batch count, batch amount, daily count, daily amount, single amount.

## About TranzCapture

Corporate One uses TranzCapture LLC, a credit union service organization, as the platform for all its item processing services. TranzCapture streamlines work through its web-based platform that offers consolidated administration and processing.

Users access TranzCapture through Members Only, Corporate One's online member portal, and conduct all item processing work, including verifying items, viewing archives and running reports from one consolidated platform. Members can count on robust reporting, real-time duplicate item and batch detection and same-day access to images in a seven-year archive.

## How Does it Work?

Business Capture enables a credit union to set their business members up to scan and transmit deposits without coming into the branch. This includes the credit union setting the business member up with a scanner, providing the secure system URL, and assigning the member its designated users access to the system. Training is also provided.
